

# SNOW-PEEL

SNOWFLAKES THAT STIMULATE

DERMAFIT+

— Aesthetic Clinic —

## What is the Snow Peel?

The Snow Peel is an advanced resurfacing treatment that uses 99% pure freshwater spicules (tiny micro-needles from freshwater sponge) to gently stimulate the skin from within.

These microscopic spicules create millions of invisible micro-channels, which:

- Speed up skin renewal (3–5× faster than normal).
- Boost collagen and elastin production.
- Enhance absorption of skin-repairing actives.

The result: fresher, smoother, brighter, and younger-looking skin without invasive downtime.

### Clinical Benefits (Research-Based)

**Wrinkles & Fine Lines:** Up to 37% reduction in wrinkle depth within 4–6 weeks after a course of treatments (spicule-induced collagen stimulation studies).

**Pigmentation:** 25–30% improvement in melasma/PIH after 3–4 sessions (due to accelerated turnover + phytic acid brightening).

**Acne Scars:** Noticeable smoothing after 4–6 treatments, with improvement rates of 40–60% in clinical case studies.

**Skin Firmness:** Increased dermal thickness and elasticity after 4–8 weeks, confirmed by fibroblast activation markers.

**Glow & Clarity:** Immediate brightening within 5–7 days as dead cells shed and new skin emerges.

## Key Active Ingredients in Snow Peel Essence

- Ectoin – protects cells from UV, pollution, and stress.
- Collagen (Hydrolyzed & Soluble) – improves elasticity and hydration.
- Sodium Polyglutamate – powerful hydrator (holds 5,000x its weight in water).
- Fibronectin – speeds wound healing & repair.
- Phytic Acid – brightens and evens skin tone.
- Centella Asiatica – calms inflammation, stimulates collagen.

These actives ensure the peel is regenerating, not just resurfacing.

## Indications – Who is it for?

- Fine lines and wrinkles.
- Pigmentation (sunspots, melasma, PIH).
- Acne scars & uneven skin texture.
- Dull, tired-looking skin.
- Loss of firmness and elasticity.

## Who should avoid it? (Contraindications)

- Active skin infections, cold sores, or open wounds.
- Severe rosacea or highly reactive skin.
- Pregnancy or breastfeeding.
- Recent isotretinoin (within 6–12 months).
- Recent chemical peel, microneedling, or laser (within 2 weeks).

## What to Expect – Treatment Timeline

- During treatment: prickling, tingling, tightness, mild heat.
- Day 1–2: redness, sensitivity, rough “sandpaper-like” texture.
- Day 2–3: dryness, flaking begins.
- Day 3–5: peeling of dead skin, revealing fresher skin.
- Day 5–7: visible glow, smoothness, and brightness.
- Week 4+: structural changes – fewer wrinkles, firmer skin, faded pigment.

## Treatment Frequency

- Skin Rejuvenation: every 4–6 weeks.
- Pigmentation/Scars: every 3–4 weeks (4–6 sessions)
- Maintenance: every 2–3 months.

## Pre-Care Instructions (Before Your Peel)

- Avoid sun exposure and tanning for 1 week before treatment.
- Stop using retinoids, acids, scrubs, or strong exfoliants 5 days before.
- No Botox/fillers/laser for at least 2 weeks prior.
- Ensure skin is free from active breakouts or infections.
- Hydrate well – healthy skin responds better to treatment.

## Aftercare Instructions (Post-Peel)

- Do not wash face for 6–8 hours after treatment.
- Avoid makeup for 24 hours.
- No exfoliation, retinoids, or acids for 5–7 days.
- Skin may peel/flake – do not pick or scratch.

### Use only:

- Gentle cleanser
- Barrier repair serum/cream (Barrier Bliss, Repair Cream)
- SPF50 daily (Solar Mist is ideal to avoid rubbing).
- Avoid saunas, swimming, or heavy exercise for 3–5 days.
- Rebook next session in 4–6 weeks.

## Why the Snow Peel Works So Well

- Works like natural micro-needling – but without needles or machines.
- Provides both stimulation + regeneration (spicules + healing actives).
- Channels remain open post-treatment → targeted serums (Pigment Rx, Renewal Rx) penetrate deeply for enhanced results.
- Proven in studies to accelerate turnover, boost collagen, and fade pigment in just weeks.

## Key Takeaway

The Snow Peel is a powerful but natural resurfacing treatment.

Expect 3–5 days of flaking and sensitivity → then brighter, smoother skin.

Best results come in a course of 4–6 treatments, with visible improvements in wrinkles, scars, and pigmentation.

Protect your results with SPF, barrier repair, and hydration.

# Snow Peel vs Green Bio-Peel

## Quick Comparison & Indications

| <p>Microchannels: Creates 4–6 million channels in up to 7 minutes.</p> <p>Solution Type: Healing + regenerative actives (Ectoin, Collagen, Fibronectin, Centella).</p> <p>Action: Deep dermal stimulation → collagen &amp; elastin induction.</p> <p>Results: Long-term improvement in wrinkles, scars, photoaging, resistant pigmentation.</p> <p>Sensation: Tingling, prickling, tightness – less heat than Green Bio-Peel.</p> <p>Downtime: 2-7 Days Dryness, Mild Peeling/Flaking</p> <p>Best For:</p> <ul style="list-style-type: none"><li>Acne scars &amp; textural irregularities</li><li>Wrinkles &amp; loss of firmness</li><li>Resistant pigmentation &amp; photoaging</li><li>Clients needing deep regeneration &amp; dermal remodeling</li></ul> | <p>Microchannels: Creates up to 6 million channels in just 5 minutes.</p> <p>Solution Type: Herbal stimulants (Mint, Geranium, Purslane, Chrysanthellum).</p> <p>Action: Mechanical spicules + biological circulation boost → faster turnover, detox, and surface correction.</p> <p>Results: Quick brightening, reduced pigmentation, clearer pores, improved acne.</p> <p>Sensation: More intense – heat, stinging, flushing.</p> <p>Downtime: 2-7 Days Dryness, Mild Peeling/Flaking</p> <p>Best For:</p> <ul style="list-style-type: none"><li>Active acne, oiliness &amp; congestion</li><li>Pigmentation (melasma, PIH, uneven tone)</li><li>Dull/tired skin needing quick radiance</li><li>Early fine lines &amp; prevention</li></ul> |

## Key Takeaway

- Acne & congestion → Green Bio-Peel (herbs add antibacterial, circulation-boosting, and detox effects).
- Acne scars & structural repair → Snow Peel (deep dermal collagen remodeling).
- Pigmentation → Both effective:
- Green Bio-Peel = faster surface clearing.
- Snow Peel = deeper remodeling for stubborn pigment.
- Wrinkles & Aging → Snow Peel (collagen induction, firmness).
- Quick Glow / Radiance Boost → Green Bio-Peel.
